

**WEBER STATE**  
**UNIVERSITY**

College of Science

DR. EZEKIEL R. DUMKE FAMILY

**PRE-MEDICAL**  
**PROGRAMS**

1 It is important to understand that there is not a “pre-medical” major at Weber State University. Rather, premedical students select a major in any discipline and, while completing the courses necessary for their degrees, also complete the courses that medical schools require.

---

2 Although preparing for medical school allows you to select any WSU major, Biochemistry, Medical Laboratory Science, Microbiology and Zoology are popular because they allow for the completion of pre-medical and undergraduate degree requirements concurrently.

---

3 Premedical students graduating from Weber State University are successful at reaching their professional goals. Over the past five years, WSU students’ acceptance into medical school has averaged 62 percent, significantly superseding the national average.
